JOB POSTING

Reference #: 01365	Posted: February 2, 2017
Job Title: Laboratory Manager/Theater Liaison	Location: Ft Gillem, GA (& OCONUS)
Org Unit: National Security	Exempt/NE: Exempt

PURPOSE: To provide technical and non-technical expertise and project management oversight in support of global Department of Defense (DoD) forensics and biometrics requirements

ESSENTIAL JOB FUNCTIONS:

- To provide oversight and direction to the laboratory staff in completion of tasks including but not limited to: laboratory operations, forensic material handling, laboratory case management, and training.
- To interface and advise senior members of DoD organizations on current and emerging forensic and biometric operational issues.
- Develop and support other technical positions to include the justification of technical recommendations.
- Monitor priorities for the allocation of critical laboratory resources to include personnel and equipment.
- Administrative review and quality control of forensic laboratory reports.
- Deployment outside the Continental United States (OCONUS) on a rotational basis as needed.

REQUIREMENTS: Bachelor's degree in a related field or equivalent experience performing duties as described and a minimum of five (5) years working in a forensic laboratory performing forensics examinations. A minimum of five years previous formal supervisory experience required. Must have five years of prior military experience providing oversight and execution of tasks. Must have experience with the deployment of personnel to operational COCOM theaters, and Anti-Terrorism/Force Protection. Three years of specialized experience as a team leader of highly skilled professional, technical and support personnel required. Must be proficient with and have experience working with Microsoft applications including Word, PowerPoint, Excel and Outlook. Must successfully complete a proficiency/competency test, as may be required by the client. Must pass U.S. Government security background investigation and be able to obtain and maintain Secret security clearance. Must pass both a physical and dental examination (as required for OCONUS assignment). Must possess a current U.S. Government issued passport.

Job Title: Forensic Chemist

Location: Ft Gillem, GA (& OCONUS)

Org Unit: National Security

Exempt/NE: Exempt

PURPOSE: To independently perform routine to moderately complex technical examination analysis.

ESSENTIAL JOB FUNCTIONS:

- Provides forensic laboratory analysis of evidence in cases involving suspected drugs, explosives or other unknown substances. Safeguards evidence and maintains chain-of-custody through the use of physical protocols and applicable documentation.
- Compare sample results to a library of known results for the specific instrumentation and chemical being tested.
- Conducts assigned examinations and experiments utilizing well defined methods and a variety of scientific tools, equipment, instrumentation and techniques. Participates with senior examiners to decide the nature and extent of examinations to be conducted on more complex materials and items of evidence.
- Assigned to coordinate routine to moderately complex matters related to scope of analyses with other laboratory units, outside agencies, and related entities.
- Performs preventative maintenance and performance checks of laboratory equipment and instruments; restocks consumable materials.
- Interprets findings to allow non-scientific end users to incorporate scientific findings into tactical planning and operations, research, and additional analysis; Presents court testimony and/or briefings regarding results of evidence examination as necessary to support mission requirements.

REQUIREMENTS: Bachelor's degree in Chemistry or related discipline. Must have a minimum of four years of experience working in a laboratory using equipment, instruments and techniques to perform drug and/or explosive chemical analysis. Must be proficient working with chemistry analytical methodologies using Gas Chromatography (GC) and/or Fourier Transformed Infrared (FTIR) Spectroscopy. Must have professional knowledge of the principles, theories, methods and technical techniques in order to analyze complex materials; Ability to adapt and develop analytical and/or technical procedures. Must have knowledge of general forensic laboratory case working procedures, quality control and safety procedures; knowledge of ISO quality standards for testing and calibration laboratories and/or the standards of the American Society of Crime Lab Directors (ASCLD/LAB) Laboratory Accreditation Board. Must be familiar with or have working knowledge of other disciplines within a forensic laboratory to assure that examinations are consistent with accepted protocols and that casework is properly coordinated with other forensic specialties as necessary. Must have excellent oral and written communication skills to communicate results of analyses. Must have knowledge of legal procedures and rules of evidence to handle evidence appropriately and provide effective testimony. Must successfully complete a proficiency/competency test, as may be required by the client. Must pass U.S. Government security background investigation and be able to obtain & maintain Secret security clearance. Must pass both a physical and dental examination (as required for OCONUS assignment). Must possess a current U.S. Government issued passport.

JOB POSTING

Reference #: 01374	Posted: September 15, 2015
Job Title: Forensic Examiner- Latent Print 3	Location: Ft Gillem, GA (& OCONUS)
Org Unit: National Security	Exempt/NE: Exempt

PURPOSE: To perform independent routine to complex technical examinations of evidence through the processing of materials for latent prints, recovery of latent prints, examinations, visualizing/recording of latent prints, examining and comparing latent prints in a forensic laboratory. Responsible for providing direction and guidance to less experienced latent examiners.

ESSENTIAL JOB FUNCTIONS:

- Performs routine forensic laboratory analysis and examinations of evidence in cases involving latent prints; Safeguards evidence and maintains chain-of-custody through the use of physical protocols and applicable documentation. Ensures safety precautions and applicable regulations are followed.
- Conducts examinations and experiments utilizing well defined methods and a variety of scientific tools, equipment, instrumentation and techniques; Identifies and initiates appropriate steps to solve a variety of analytical problems; Performs transfer of technology, methods development and validation applicable to analysis of evidence; Identifies research requirements to enhance examination methods and coordinates with the client's and other research components as necessary; Provides guidance to junior examiners regarding the nature and extent of examinations to be conducted on more complex materials and items of evidence.
- Prepares and furnishes authoritative oral and written reports to facilitate investigative, intelligence, prosecution and other functions that support mission requirements. The reports will require the ability to clearly convey the opinions and findings as determined through detailed examinations and analysis. Updates case management and other database systems as required.
- Coordinates routine to moderately complex matters related to scope of analyses with other laboratory units, outside agencies, and related entities.
- Provides authoritative support to the client and other components within a multi-agency activity. Participates in liaison and meetings with officials from outside agencies to coordinate cases of mutual interest. May provide training regarding the analytical process and related functions consistent with the needs of the client.
- Presents court testimony regarding examination of evidence as necessary to support mission requirements.
- Travel: OCONUS deployment to Afghanistan required on rotational basis.

JOB QUALIFICATIONS: High school diploma or equivalent required. Must have a minimum of six (6) years of direct experience working in a forensic laboratory processing materials for latent prints, recovering/visualizing/recording latent impressions, evaluating latent prints, and examining and comparing latent prints to known fingerprints. Professional certification as a Latent Print Examiner (CLPE) by the International Association of Identification (IAI) is required. Proficiency utilizing FBI-NGI/IAFIS, DoD-ABIS, and/or other automated fingerprint identification system (AFIS) database is desired. Must have professional knowledge of the principles, theories, methods and technical procedures used to process materials for latent prints, recovery of latent prints, visualizing/recording of latent prints, and examining and comparing latent prints to known fingerprints (or other latent prints) in a forensic laboratory. Must have knowledge of general forensic laboratory case working procedures, quality control and safety procedures; knowledge of ISO quality standards for testing and calibration laboratories and/or the standards of the American Society of Crime Lab Directors (ASCLD/LAB) Laboratory Accreditation Board. Must be familiar with or have working knowledge of other disciplines within a forensic laboratory to assure that examinations are consistent with accepted protocols and that casework is properly coordinated with other forensic specialties as necessary. Must have excellent oral and written communication skills to communicate results of analyses. Must have knowledge of legal procedures and rules of evidence to handle evidence appropriately and provide effective testimony. Must be able to perform analyses and administrative functions within prescribed parameters set by client facilities regulations, guidelines, and procedures. Must pass U.S. Government security background investigation and be able to obtain & maintain Secret security clearance. Must pass both a physical and dental examination (as required for OCONUS assignment). Must possess a current U.S. Government issued passport.

ORAU

JOB POSTING

Reference #: 01378	Posted: February 2, 2017
Job Title: Forensic Examiner- Firearms and Tool Marks	Location: Ft Gillem, GA (& OCONUS)
Org Unit: National Security	Exempt/NE: Exempt

PURPOSE: To perform all aspects of firearms and tool marks examinations; stays abreast of the latest research to determine the best analytical methods to examine evidence; conducts examinations of highly complex and unique evidence; and composes a variety of reports and scientific papers. Initiates, performs and oversees examinations of a wide-variety of materials using one or more specialized forensic science disciplines.

ESSENTIAL JOB FUNCTIONS:

- Provides forensic analysis of evidence in cases involving multiple submissions where inter-comparison of evidence is necessary. Coordinates with other internal disciplines and outside government agencies as necessary to facilitate forensic examinations in complex cases Safeguards evidence and maintains chain-of-custody through the use of physical protocols and applicable documentation.
- Initiates and performs the full range of analytic procedures in a forensic laboratory and field laboratory or similar settings. Procedures include examinations to identify and characterize complex evidence and provide findings in a clear and concise manner. Examination process includes the preparation of sample/s, selecting and entering instrument settings, performing scientific analyses, and tabulating results. Coordinates as necessary with outside laboratories and/or other agencies and industry.
- Utilizes and modifies as necessary a variety of highly complex scientific equipment and procedures in order to obtain detailed and sometimes obscure characteristics of a wide-variety of unique evidentiary materials. Interprets findings to allow non-scientific end users to incorporate scientific findings into tactical planning and operations, research, and additional analysis.
- Using sound scientific principles modifies, adapts and develops standard methods and techniques in order to identify critical characteristics of evidence. Identifies and initiates appropriate steps to solve a variety of analytical problems. Performs transfer of technology, methods development and validation applicable to analysis of evidence. Identifies research requirements to enhance examination methods and coordinates with the client's and other research components as necessary. Stays abreast of the latest research/developments in scientific methods to identify possible solutions to complex problems.
- Prepares and furnishes authoritative oral and written reports to facilitate investigative, intelligence, prosecution and other functions that support mission requirements. The reports will require the ability to clearly convey the opinions and findings as determined through detailed examinations and analysis. Updates case management, image reference databases(e.g. IBIS, NBIN), and other information management systems as required
- Provides authoritative support to the client and other components within a multi-agency activity. Participates in liaison and meetings with officials from outside agencies to coordinate cases of mutual interest. May provide training regarding the analytical process and related functions consistent with the needs of the client.
- Presents court testimony regarding examination of evidence as necessary to support mission requirements.
- Travel: OCONUS deployment to Afghanistan required on rotational basis.

REQUIREMENTS: High school diploma or equivalent required and a minimum of 5 years of job related experience are required. One year experience as the lead of a team of firearms and toolmarks analysts preferred. Must have experience in using laboratory equipment and techniques involving toolmarks and firearms, bullets, cartridges, shot pattern and trajectory analysis, and related activities and techniques. Must possess basic knowledge of general procedures used to collect and process evidence. Must have professional knowledge of the principles, theories, methods of microscopic and technical techniques in order to analyze complex materials; and to adapt and develop analytical and/or technical procedures. Must have knowledge of general forensic laboratory case working procedures, quality control and safety procedures; knowledge of ISO quality standards for testing and calibration laboratories and/or the standards of the American Society of Crime Lab Directors (ASCLD/LAB) Laboratory Accreditation Board. Must be familiar with or have working knowledge of other disciplines within a forensic laboratory to assure that examinations are consistent with accepted protocols and that casework is properly coordinated with other forensic specialties as necessary. Must have excellent oral and written communication skills to communicate results of analyses. Must have knowledge of legal procedures and rules of evidence to handle evidence appropriately and provide effective testimony. Must be able to perform analyses and administrative functions within prescribed parameters set by client facilities regulations, guidelines, and procedures. Must successfully complete a proficiency/competency test, as may be required by the client. Must pass U.S. Government security background investigation and be able to obtain & maintain Secret security clearance. Must pass both a physical and dental examination (as required for OCONUS assignment). Must possess a current U.S. Government issued passport.
